#### **DETAILED ACTION**

#### Election/Restrictions

1. Applicant's election with traverse of Group II claims 45-47 in the response filed 02/15/2005 is acknowledged. Applicant's arguments filed 02/15/05 have been fully considered but they are not persuasive. Traversal was on the grounds that the restriction requirement does not provide sufficient basis to indicate that examination of more than one of the inventions would overly burden the Examiner. Particularly, applicant argues the only reason for burden given is that a divergent literature and patent search would be required. The examiner maintains that the requirement for burden has been established as separate classification is prima facie for burden. The examiner maintains the restriction requirement made previously, as each group is correctly separated as unrelated or patentably distinct and the restriction is herein made Final. Claims 26-47 are withdrawn from further consideration by the examiner, 37 CFR 1.14(b), as being drawn to a non-elected invention. Claims 45-47 are under examination.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 45-47 are rejected under 35 U.S.C. 102(b) as being anticipated by Yale University (WO 97/19193, 05/29/1997).

Yale University teaches a kit comprising a single-stranded circular DNA molecule, a rolling circle replication primer and a strand displacement primer (see p. 115 paragraph 7 and 8). No patentable weight is given to the intended use language, for example, a kit for amplifying a target nucleic acid sequence.

### Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 45-47 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 25-26 of U.S. Patent No. 6255082. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patented claims and the instant claims are related as species/genus.

#### Summary

4. No claims are allowed.

#### Correspondence

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Heather G. Calamita whose telephone number is 571.272.2876 and whose e-mail address is heather calamita@uspto.gov. Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public. For more information about the PAIR system, see http://pair-direct.uspto.gov.

For all other customer support, please call the USPTO Call Center (UCC) at 800-786-9199.
